PROFESSIONAL SUMMARY

Passionate and results-driven **Full Stack Developer** with hands-on experience in building responsive and scalable web applications using the MERN stack (**MongoDB, Express.js, React.js, and Node.js**). Proficient in developing **RESTful APIs**, implementing authentication, managing databases, and creating intuitive user interfaces with **HTML, CSS, JavaScript, and Tailwind CSS**. Strong problem-solving skills, a solid understanding of software development principles, and practical experience gained through **internships and real-world projects**. Eager to contribute technical expertise and continuously grow in a collaborative development environment.

SKILLS

JavaScript — Tailwind CSS — React — Mongo DB — Node JS — Express JS — HTML — CSS

EDUCATION

Chandigarh Group of Colleges

B.Tech in Artificial Intelligence and Data Science (Ai & Ds)

- CGPA: 7.5/10

Landran, Mohali

(2021-2025)

Govt. Model Sr. Sec. School – 8

CBSE – Class 12th

- Aggregate: 83%

Chandigarh

(2020 – 2021)

Hansraj Public School

CBSE – Class 10th

- Aggregate: 84%

Panchkula, Haryana

(2018 – 2019)

WORK EXPERIENCE & CERTIFICATIONS

- Python with Data Science Training by **NIELIT** Sector 30 Chandigarh (4 weeks)
- **SWAYAM** Online Course certification on OS (January – May 2025)
- MERN Stack Industrial Training by Future Finders sector **74 Mohali** (January – May 2025)
- Full Stack Developer Internship at **BONNTECH Solutions** K&B Tower phase 8B Mohali (July 2025 – December 2025)
- Full Stack Developer Internship at **KP IT experts** Sector 74 Mohali (February 2026 – Present)

KEY PROJECTS AND EXPERIENCE

Roto: Everyday carry | Full Stack E-Commerce Platform

([GITHUB](#))

- Roto is a full-stack, production-style e-commerce platform built using **React (frontend), Node.js + Express (backend), and MongoDB Atlas (database)**. It delivers a complete end-to-end online shopping experience with a scalable architecture and modern UI/UX design. The platform enables customers to browse products, **view detailed product pages, manage their shopping cart, and place orders through a seamless and responsive interface**. It is fully integrated with a secure REST API and cloud-hosted database, ensuring smooth and real-time data flow between frontend and backend.
- In addition to the customer-facing store, Roto includes a powerful **admin dashboard** that allows business owners to manage their entire store ecosystem. Through the admin panel, they can add new products, update or delete existing listings, monitor inventory, and view platform analytics for better decision-making and control.

🌐 Live Link: <https://roto-zeta.vercel.app>

School ERP | Full-Stack School Management System

([GITHUB](#))

- Built a full-stack, role-based school management system (MERN) with distinct **Admin, Teacher and Student** portals, using **JWT authentication** and bcrypt-hashed credentials for secure access control. Designed REST APIs and MongoDB schemas for core modules — **Class management, Attendance tracking, Timetable scheduling, Announcements, Result and Fees** — with role-based middleware restricting **admin-only actions (user/class creation)** from teacher/student read access.
- Developed a responsive React (Vite) frontend with protected, role-aware routing, an Axios-based API layer, and a Recharts-powered **admin dashboard** for attendance and class statistics
